#### Others:

AI, Gameplay, UI, Databases, Version Control Software, OOP, Some Networking, Scripting, Mobile and Computer games, Code Optimisation, GDD and Trello.

### PROFILE

I am a programmer passionate about playing and creating new/fun worlds. I am mainly interested in the field of gameplay and user interfaces. However, I also love the areas of VR, AR, AI, and finding/fixing errors (QA).

I have the right to work in EU and UK.

### EXPERIENCE

#### JUNIOR GAME PROGRAMMER - (MAY. 2020 – PRESENT)

##### KWALEE

Mobile game studio in the UK focused on the hyper-casual and hybrid-casual genre. Since starting in this role, I quickly progressed into the first team developing hybrid-casual genres. The technology we use is Unity and C#. This includes developing and supporting tools to improve product development; as well as server interaction and communication with other departments.

#### GAME PROGRAMMER - (JUN. 2018 – APR 2019)

##### SUPER AWESOME HYPER DIMENSIONAL TEAM

Spanish indie game studio. Focused on testing and developing fun experimental ideas for new games to explore additional target markets. The technology we used was Unity and C#. This included developing new methodologies for product development as well as multi-platform support.

#### GAME PROGRAMMER - (MAR 2018 – JUN 2018)

##### ITION

Spanish indie game studio. Short-term contract to develop and improve specific features of one of their games. The technology we used was Unity and C#.

#### GAME PROGRAMMER - (JAN 2017 – DEC 2017)

##### INFINITE GAMES STUDIO

Spanish indie game studio. Responsible for a variety of tasks, from creating new games to reworking old ones by optimising existing elements and developing additional ones. The technology we used was Unity and C#.

### HOBBIES/INTERESTS

#### FAVOURITE GAMES

World of Warcraft, Overwatch, Kingdom Hearts, Star Wars Battlefront, etc.

#### OTHERS

Music, Movies, Programming, Boardgames, Cooking, Tennis, Travelling and Playing Games.
