Capacity to work under pressure
ABOUT ME

I am a video games programmer with a big passion for playing and creating games who want to accomplish one of his dreams: Being able to be part of the video games industry through the use of my knowledge obtained during these years and combining it with other experienced people to create new worlds. I am mainly interested in the field of gameplay. However, I also love the areas of AI, UI and others more uncommon such as musical programming aspects. Permission to work in EU and willing to relocate if required.

EXPERIENCE

GAME PROGRAMMER
Infinite Games Studio / June 2017 – Present

Programming a rework to Eternal Walk 2 which is a survival horror game. Creating Gameplay, UI and much more elements in a group of other four people. Nowadays, it is under construction using as engine Unity and C# as the primary programming language.
