

Javier Pastor Serrano

Game Programmer · Mobile Games · Live Operations

+34 649 016 335 | javierpastorserrano@gmail.com | Seville, Spain

Profile

I am a programmer with a background in game development and experience building products from early prototypes to polished releases. I enjoy creating reliable systems, useful tools and thoughtful user-facing features in fast-moving teams.

Experience

Engineer
Scopely | Seville, Spain | Hybrid
April 2026 - Present

- Contributing to Monopoly GO!, a Unity/C# live-service mobile game played by millions, across Friends-related social systems and features such as Community Chest.
- Supporting live operations through new content, bug fixing, internal tools and selected server-side tasks.
- Supporting A/B testing and KPI-focused improvements in collaboration with product, design and engineering teams.

Mid-Level Game Programmer
Voodoo | Paris, France | Remote
June 2025 - January 2026

- Contributed to high-performing Unity/C# mobile titles by implementing new features and refining established systems.
- Integrated analytics, ads, IAP and internal SDKs; prepared iOS/Android builds and shipped regular updates.
- Configured A/B tests, improved KPIs through analytics, and contributed to build-size and runtime performance work.

Mid-Level Game Programmer
Kwalee | Royal Leamington Spa, UK | Hybrid
May 2020 - June 2025

- Developed and shipped Unity/C# mobile games from prototype to release across new and existing titles.
- Maintained live titles through gameplay updates, bug fixing, SDK integrations and regular iOS/Android releases.
- Collaborated cross-functionally on LiveOps, performance, build size and KPI improvements using analytics and A/B testing.

Junior Game Programmer
Super Awesome Hyper Dimensional Team | Valencia, Spain | Remote
June 2018 - April 2019

- Built and showcased a Unity prototype to 500+ attendees at Indie Summit Valencia, refining it through player and judge feedback.
- Implemented gameplay, scene flow and multi-platform support with C#, Git and Spine 2D.

Junior Game Programmer
Iction | Valencia, Spain | Remote
March 2018 - June 2018

- Implemented gameplay features across Unity/C# projects.
- Fixed technical issues and supported project stability.
- Supported project setup and daily development workflows.

Junior Game Programmer
Infinite Games Studios | Valencia, Spain | Remote
January 2017 - December 2017

- Implemented features and supporting systems in Unity/C#.
- Fixed bugs and contributed to performance and project stability.

Skills

Main Skills

- Unity Engine
- C#
- Git
- OOP
- Optimisation
- SDK Integrations
- Live Operations
- iOS / Android
- A/B Testing
- Analytics
- Design Patterns
- Code Architecture
- Gameplay Systems
- UI Systems

Complementary Skills

- Unreal Engine
- C++
- UML
- Debugging
- Profiling
- DOTween
- Build & Release
- Shaders (Basic)
- Jira
- AI-Assisted Dev
- Server-side Support
- Testing
- Tools
- Notion

Soft Skills

- Adaptability
- Communication
- Collaboration
- Ownership
- Task Estimation
- Problem Solving
- Agile Workflow
- Attention to Detail

Education

BSc Computer Games Programming
Teesside University | Middlesbrough, UK
2016 - 2017

HND in Video Games Programming
ESAT | Valencia, Spain
2013 - 2016
